

MASTERY PROJECT - LunchOrder Chapter 7
Student name: Misha Stanev

CS Error/Bug log

```
private double total;
private int hamburger, salad, fries, soda;
public LunchOrder() {
    total = hamburger*1.85+salad*2.00+fries*1.30+soda*0.95;
}
public void setLunchOrder() {
    total = hamburger*1.85+salad*2.00+fries*1.30+soda*0.95;
}
public void setHamburger(int h) {
    hamburger += h;
}
public void setSalad(int s) {
    salad += s;
}
public void setFries(int f) {
    fries += f;
}
public void setSoda(int S) {
    soda += S;
}
public double getLunchOrder() {
    return total;
}
```

When I enter the amount of each item, it will calculate the total but it will always output \$0 as the total
